

Friday: Disorders of speech motor control

Time 13:30 - 16:00

Author

Bouchard, M., Menard, J. et al.

Rastadmehr, O., Bressmann, T.

Croot, K., Palethorpe, S. et al.

Corijn, M., Miller, N. et al.

Maas, E., Robin, D.A. et al.

Schmid, G., Ziegler, W.

Theiner, N.,

Van der Merwe, A.,

Mennen, I., Gardiner, F. et al.

Bartle, C., Goozee, J. et al.

Yunusova, Y, Green, J. et al.

Van Lancker Sidtis, D., Kempler, D.

Mohr, J., Murdoch, B.E. et al.

Oh, S-Y., Cohen, H. et al.

Cannizzaro, M.S., Cohen, H. et al.

O'Donoghue, C., Watts, C. et al.

Miller, N.

Gosy, M., Horvath, S.

Murdoch, B.E., Goozee, J.V.

Type: Postersession

Title

Speech production in prelinguistically deaf children following cochlear implantation

Impact of lateral tongue resections on midsagittal tongue movement during speech

What is the nature of the motor speech disorder in foreign accent syndrome?

Spontaneous speech outcomes from word/sentence level therapy with a focus on self-monitoring in a case of apraxia of speech

Motor programming in apraxia of speech: A reaction time approach

Audio-visual matching abilities vary with motor abilities in patients with aphasia and apraxia of speech

Influences on speech output in acquired apraxia of speech: a comparison of English and German

Variability of voice onset time, vowel duration and utterance duration in apraxia of speech

An electropalatography study into the effects of Lee Silverman Voice Therapy on articulation

Confirmation of silent articulatory attempts/ starters in Acquired apraxia of speech

Spatial characteristics of speech movements in ALS

Vowel lengths in initially shortening word paradigms in three kinds of aphasic speech

Electropalatographic assessment of tongue-to-palate contacts in dysarthria associated with Friedreich's ataxia

Risperidone effect on speech motor control in healthy subjects

The effects of acute dopamine antagonism on speech production in healthy adults

Cognitive-linguistic and motor speech performances in tremor-dominant and akinetic rigid dominant subtypes of Parkinson's disease

Prevalence and patterns of intelligibility decline in Parkinson's disease

Hypernasality: Interrelations of acoustic patterns of speech and brain imaging techniques

Lingual kinematics during speech in persons with multiple sclerosis
